More experienced plug-in developers — and sometimes lazy plug-in publishers — have learned to find the eclipse/plugins directory and install their plug-ins there manually. This obviously is a more dangerous approach, as no certification takes place about the suitability of the plug-in; it may rely on other plug-ins not available

FindBugs in Eclipse - Tutorial

A Juno plugin named `org.eclipse.jetty.server_<version>.jar` conflicts with the MTJ libraries when the plugin version is higher than 6. If the `org.eclipse.jetty.server` version is higher than 6 you must prevent it from loading by changing its name so the JAR file is not parsed.
