The sexual response cycle has four phases: excitement, plateau, orgasm, and resolution. Both men and women experience these phases, although the timing usually is different.

### **Sexual Response Cycle: Sexual Arousal, Orgasm, and More**

The iPS cells converted from skin fibroblasts by transducing four transcription factors (Oct3/4, SOX2, Klf4, c-Myc) have the potential to generate all tissues in the body, including vascular cells. This innovative approach will likely allow for rational designs of vascular regenerative therapy against Alzheimer's disease.
