The Global Positioning System was originally developed for military use but has been readily available for civilian use since the 1990s. In addition to its use in mobile devices and car navigation systems, GPS is used for land surveying. Surveying was one of the first commercial adaptations of GPS technology.

How to Use GPS for Land Surveying (and Pros & Cons)

Spectra Geospatial is an established brand known for delivering quality products to the survey, GIS and construction markets. Focusing on the specific needs of the conventional surveying market, the Spectra Geospatial brand offers a complete product portfolio including Global Navigation Satellite Systems (GNSS), Global Positioning Systems (GPS), optical total stations, data collection hardware ...

NMEA support. NMEA 0183 is the data specification standard that Survey123 uses to communicate with GPS receivers. NMEA messages contain lines of data called sentences. Survey123 derives GPS information such as latitude, longitude, height, and fix type by reading specific sentences in NMEA messages.. Survey123 supports NMEA 4.00 and 4.10. It can read the following NMEA sentences:

Use a high-accuracy receiver—ArcGIS Survey123 | Documentation

Spectra Survey Pro GNSS shares nearly all the Survey Pro functions, plus it provides the capability to collect data from GNSS receivers a GPS system with global coverage at centimeter level-accuracy. Survey Pro GNSS software is easy to use and has step-by-step features that reduce training and simplify setups.
